Creating tomorrow, Today.

SPACE *RETURN*

Made in California, Founded in Ventura County.
We are the first Space Industry Cluster
in North America.

AS9100D / ISO 9001:2015 / ITAR / SBE / MBE / WOSB / SB-PW / WBE
SpaceReturn//// The California Space Cluster for Advance Manufacturing

RAKAR    

SpaceRETURN//// is changing the way we address our challenges today to create better solutions. We are purveyors of innovative outcomes and advanced solutions for the industry's most complex task requirements in space and on earth. With a cluster approach consisting of Small Businesses transitioning from traditional to advanced manufacturing practices. We provide complete services in **advanced manufacturing, for space, biotech, aerospace, energy, and defense**. From advisory and consulting, feasibility, planning, design, program and lifecycle management, we have created the first northamerican space cluster for advanced manufacturing to create access to to qualifeied work force around the 10 major NASA Space Centers in the US.

SPECIALIZED ADVANCED MANUFACTURING

We have partnered with the world's largest providers in the advanced technology industries, data processors, electronics, semiconductors and specialized manufacturing. Our data driven project delivery model ensures we are the van garde.

SPACE TRANSPORTATION

Manned space transportation solutions that are equitable, sustainable and smart, integrating transportation infrastructure that can connects people and communities to an interplanetary model stimulating economic development. From large scale transport, rovers, satellites, and habitats we'll make a better future for generations moving forward

10 REGIONAL CLUSTERS

Utilizing data-driven technology, we improve connectivity amongs small businessed to improve economic and social equity and the resiliency of our regions. We create infrastructure that promotes inclusive solutions, to a reimagined small business driven eco-system transforming the future models of manufacturing, we work with governments, communities and private-sector to enable the delivery a better technology and processes for future generations of creators, makers and entrepreneurs.

ENERGY SECURITY

It takes a lot of fuel to get to space! Current energy generation, transport and usage including decarbonizing and storage are at the core of space industry. We work to make innovation to sustainable secure energy accesible to small businesses.

OUR COMM(UNITY)S

We pioneer solutions that create a positive impact for the people in our communities. Whether in planning or ensuring compliance, we provide services that help our members combat the challenges of bidding on large contracts. With more than four decades of experience with the most demanding manufacturing challenges, our solutions cross every phase of the project lifecycle from bidding to delivery and post project learning.

X-OVER POTENTIALITY

To create complex manufacturing facilities for small businesses who are developing biotech creating capacity and impacting lives. Forming the best teams to design, build, qualify and commission avant garde manufacturing facilities within accelerated timelines with focus on a culture of safety, quality and favorable cost-benefit outcomes.

AN INTERPLANETARY FUTURE

Addressing challenges like self sustaining space habitats will bring about technology to deal with climate change, water management, and infrastructure and emerging contaminant challenges here on earth, managing this essential resource has never been more complex. We provide all-encompassing solutions- from essential supplies, to resource resilience and recovery- enabling interplanetary communities, and industries providing sustainable resources to thrive here on earth.
